EDUCATION

CHULALONGKORN UNIVERSITY

B.Eng., Computer Engineering and Digital Technology (CEDT)

Relevant Coursework: Full-Stack Software Development

Bangkok, TH

2026 - present

EXPERIENCE

CEDT SOLUTION CLUB

Bangkok, Thailand (Hybird)

Backend Engineer

Sep 2026 – present

- Engineered RESTful API endpoints and designed relational database schemas utilizing FastAPI and PostgreSQL for the CEDT Startup CO-OP platform
- Architected backend logic to streamline cooperative education matching workflows connecting 4th-year students, university administrators, and academic lecturers
- Deployed and maintained scalable microservices infrastructure employing Docker containerization, Git version control, and Huawei Cloud

CHULALONGKORN UNIVERSITY

Bangkok, Thailand (Hybird)

HIGH ALTITUDE RESEARCH CLUB (CUHAR)

Avionics Engineer

Sep 2026 – present

- Designed and fabricated custom printed circuit boards (PCBs) utilizing KiCad to support critical high-altitude rocket flight operations
- Programmed embedded C/C++ flight software via STM32CubeIDE to process real-time sensor data, transmit telemetry, and trigger automated parachute ejection mechanisms
- Executed comprehensive hardware-in-the-loop testing protocols to validate avionics reliability and subsystem integration prior to launch

CHULALONGKORN UNIVERSITY SATELLITE

Bangkok, Thailand (Hybird)

AND AEROSPACE TECHNOLOGY CLUB (CUSAT)

Onboard Computer & Flight Software Engineer

Aug 2026 – present

- Developed core flight software for the CUSAT-1 1U satellite Onboard Computer (OBC) to execute nationwide flood-observation missions utilizing an optical camera payload
- Integrated concurrent inter-subsystem data pipelines across Electrical Power (EPS), Attitude Determination (ADCS), and Communications modules for orbital deployment via the ISS Kibo module
- Implemented CCSDS 133.0-B space packetization, Reed-Solomon error-correction encoding, and telemetry data budget calculations to ensure robust orbital data transmission

LEADERSHIP & ACTIVITIES

AEROSPACE & AI COMPETITIONS

Saraburi, Thailand

TECHNICAL PROJECT MANAGER

Jan 2026 - Jun 2026

- Technical Project Manager & Advisor | Aerospace Competitions
 - Served as Project Manager and Software Engineer for the 2025 Thailand CANSAT-ROCKET Competition, directing technical strategy and flight software development to secure the National Deployment Award
 - Advised two multidisciplinary engineering teams during the 2026 Thailand CANSAT-ROCKET Competition, providing technical mentorship that led to both the Deployment Award and the Best Failure Award

SKILLS & INTERESTS

Technical: Python, C/C++, PyTorch, TensorFlow, FastAPI, Git, Docker, PostgreSQL, LaTeX, KiCad

Language: Thai (Native), English (Professional Working Proficiency)

Interests: Aerospace & Space Technology, Algorithm Optimization, Fitness & Endurance, System Customization & Strategy Gaming
